## SUMMARY

---

Game Developer specializing in Unreal Engine 5 with nearly 2 years of hands-on experience. Proficient in Blueprint visual scripting, gameplay mechanics, AI behavior systems, C++ and 3D asset integration. Computer Science student with strong problem-solving abilities and proven track record of creating engaging game experiences from concept to completion.

Key Achievements: Consistent 5-star client ratings | Self-taught UE5 specialist | Worked in YouVerse Company

## EXPERIENCE

---

### 1) Junior Unreal Engine Developer

YouVerse | 3/2026 – 5/2026 | 275+ Hours Worked

- Developed and localized interactive UI systems in Unreal Engine, including Profile Screens, Booth UI, Preferences Widgets, and Loading Screens with full Arabic/English support.
- Integrated external web-based systems such as MetaPerson Avatar Creator and Deal Engine directly into in-game pop-up interfaces.
- Implemented cinematic camera transitions and player-identification systems while fixing complex interaction and camera rotation bugs.
- Refactored gameplay/environment systems including Wind and Rock mechanics into core gameplay for improved maintainability.
- Fixed Map Patching and downloading system issues, optimized progress bars, and participated in full game testing and polishing.

### 2) Freelance Game Developer

Self-Employed | 05/2024 - Present

- Successfully delivered 13+ commercial game development projects to clients in the USA and Europe
- Achieved and maintained consistent 5-star client satisfaction ratings across multiple complex projects
- Specialized in creating complete gameplay systems from scratch using Unreal Engine 5
- Built strong reputation for timely delivery and professional communication with international clients
- Evolved from basic implementations to advanced gameplay mechanics through iterative client work

#### Specialized Systems

- Third-Person & First-Person Mechanics
- Platformer Movement Systems (2D & 3D)
- Stealth & Horror Game Mechanics
- Zombie AI & Enemy Behavior
- Health/Damage & Combat Systems
- Shooting Systems (Recoil, Reload, Ammo)

## Published Plugins:

11/2025

MichaelByte\_AI Plugin for Unreal Engine

Published on LinkedIn

- <https://drive.google.com/drive/folders/1D3pd1BsdK2YPRw1t1TIUC2exuoy5gMjW>
- Developed custom AI plugin featuring hearing and vision detection systems
- Implemented using Behavior Trees and AI Perception components
- Open-sourced for community use and feedback

## Game Jams

1- Competitive Global Game Jam (2026) : GREYMAN

Build Duration: 48 hours

Game Jam: Canadian University, Egypt (8th place)

2 - Non-Competitive Global Game Jam (2026) : Flow Flam

Build Duration: 48 hours

## EDUCATION

---

Computer Science

09/2023 - Present

Zagazig University - Bachelor's degree

- Relevant Coursework: Programming with C++, Data Structures, Algorithms, Software Engineering, Mathematics
- Collaborative Learning: Successfully completed 15+ team-based programming projects requiring code integration, task delegation, and joint presentations
- Experience with Git version control through academic assignments
- Strong foundation in object-oriented programming, problem-solving, and software development principles
- Active participant in group coding sessions and peer programming activities

Sharkya STEM School - STEM High School for Outstanding Students

09/2020 - 06/2023

- Selective science and technology focused high school (American curriculum)
- Established in honor of Nobel Prize winner Dr. Ahmed Zewail
- Team Projects: Completed multiple collaborative STEM projects requiring teamwork, presentations, and cross-disciplinary coordination
- Developed strong analytical, scientific thinking, and group collaboration skills

## CERTIFICATES

---

Ministry of Communications and Information Technology (MCIT), Egypt

07/2025 - Present

- Certified Software Development - Mobile App Developer
- Digital Egypt Pioneers Initiative - DEPI Program
- Skills: Software Development, Mobile Applications, Android Development, Flutter

IBM

Present

- Certificate For Course from IBM in Data Science
- Skills: Data Science fundamentals and analysis
